Security Analysis

When it comes to security and surveillance, the technology and gadgets without security analysis do not carry the same meaning...

We at Limra assess the Security Concerns, measure the Security Threats and then design counter measures by adopting latest Technologies available.

Hybrid CCTV Video Surveillance Systems

A conventional CCTV system contains analog cameras with standalone DVRs or Computer based DVRs with Coaxial media cables and AC power cables with DC Adaptors and thick bulky Monitors.

We can integrate your present Analog CCTV system with modern IP Based CCTV Security and Surveillance.

Bringing in, the proof of concept of Human Behavioral Analysis and Video Analytics, we give a meaning to security and surveillance, so that your security staff can preempt any threatening situation.

A complete security and surveillance system with powerful video forensics and scene analysis make the investigations quick and smart.

With Intelligent Video Security and Surveillance system, you can save recurring costs which you spend on Security Guards.

With such a system you can monitor any remote site throughout the world via Secure VPN using your web browser, even you can get Alerts at your Mobile phones or email for any alarmed situation, other than your Central Monitoring Center.

Whether it's a small Enterprise or City Wide Surveillance, we excel in designing and Implementation of small and large CCTV Security and Surveillance systems.

We design unique security and surveillance systems as per your needs not only to secure people and assets but efficient monitoring and alert generation from your area of interest for Campus environments, Corporate Structures, Banks, Airports, Sea-ports, Factories, Community Residence etc.
